County of San Diego

Department of Agriculture,
Weights and Measures

Pest Detection Program

Safeguarding Your Food Supply!

Help Keep Unwanted Invasive Pests Out of San Diego County!

The Department of Agriculture, Weights and Measures conducts an ongoing Invasive Pest Detection Survey to find serious plant pests including: exotic fruit flies, Japanese beetle and Gypsy moth.

Examples of unwanted pests:
Mediterranean Fruit Fly and
Mexican Fruit fly.

McPhail Trap
used to catch Mexican
Fruit Fly

Thank you for making a difference!

Your participation helps to:

- prevent damage to fruits, vegetables and landscape ornamentals.
- reduce pesticide usage.
- reduce consumer costs for fruits and vegetables.
- protect the environment.

We are always looking for new trapping sites. You can help by allowing County trappers to place insect traps in your yard.

- Ideal fruit fly trapping sites will have fruit trees such as apricot, peach, nectarine, citrus, guava or loquat.
- Ideal Japanese beetle and Gypsy moth trapping sites will have roses, turf or landscape ornamental plants.

Please call. 1-800-300-TRAP (8727)
